Office Action Summary	Application No. 10/664,134	Applicant(s) RAMZIPOOR ET AL.	
	Examiner JING OU	Art Unit 3773	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. This action is responsive to the amendment filed on July 24, 2008 along with an REC filed on July 16, 2008. Claims 49-53 and 55-65 are pending. Claims 1-48 are cancelled.

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 07/24/2008 has been entered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 49-53 and 55-65 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In Claim 49-53 and 55-65, at least the length, uniform width, thickness, uniform profile, and line tangent of the wire and

descriptions of the length, uniform width, thickness, uniform profile, and line tangent of the wire cannot be found in the original specification and are considered as new matter.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 49-53 and 55-65 are rejected under 35 U.S.C. 102(b) as being anticipated by Dubrul et al (US Pub. No.: 2002/0019597).

In regard to Claim 1, Dubrul et al discloses an embolectomy device, comprising: a catheter (**120**), a vacuum source fluidly connected to the distal end of the first shaft and second shaft (there must be a vacuum source located outside the tissue and fluidly connected to the distal end of the first shaft and second shaft since fluid is withdrawn through suction inlets 122, Fig 11A); and a wire (the wire of the mesh cutter 138, Fig. 11D).

Response to Arguments

3. Applicant's arguments filed 07/24/2008 have been fully considered but they are not persuasive.

As noted above, all of the claimed structure is found in the reference and the examiner contends that the prior art is capable of performing the claimed functions.

Applicant should be noted that at least the length, uniform width, thickness, uniform profile, and line tangent of the wire and descriptions of the length, uniform

width, thickness, uniform profile, and line tangent of the wire stated in Claim 49-53 and 55-65 cannot be found in the original specification and are considered as new matter.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to JING OU whose telephone number is (571)270-5036. The examiner can normally be reached on M-F 7:30am - 5:00pm, Alternative Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Uyen (Jackie) T Ho can be reached on (571)272-4696. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
